METZ blue – a German Brand.

Through a combination of the strength of Skyworth, a global player in the TV business, and the 80 years of experience of traditional German manufacturers Metz, high-quality smart TV solutions are being created by METZ blue, with the aim of making state-of-the-art screen technology available to everyone.

Reliable. Smart. Connected. User friendly.

We're convinced that technology shouldn't just work – it should also be fun. Our products are characterised by high reliability – they are simple to operate and, thanks to smart functions, can bring almost unlimited entertainment into your living room.

METZ blue – always your choice.

Smart television – tailor-made for you.

Equipped with fascinating picture and sound technology, television is now an experience for the senses – thanks to breathtaking contrast, brilliant colours and razor-sharp detail.

Smart functions enable you to access content. Thanks to integrated apps and access to Google Play Store, your METZ blue TV offers you enormous diversity. Whether blockbuster movies or Netflix series, live sport or games: METZ blue Android TVs always provide the right content – tailor-made for you. METZ blue TV solutions can be customised to suit your preferences and wishes. Factory-integrated Chromecast means that content from Android or iOS devices can be mirrored. And integrated voice search will allow you to access your desired content even quicker.

Stylish and functional.

We place great value upon a balanced combination of technology and design. METZ blue TVs are characterised by a minimalistic, slim design that will seamlessly fit into any living area while providing the room with a real eye-catcher.

Deepest black – stunning contrast.

OLED technology provides unprecedented blacks: OLED panels deploy 33 million subpixels, each of which is selectable and disconnectable. Dark image areas can be turned off with pixel-precise accuracy in order to display real black.

And darkest black thus brings breathtakingly brilliant colours, crisp contrast and excellent detail to the screen – and all this at ultra-fast reaction times: OLED screens react more quickly and more fluidly than ever before.

HDR10

Explosive colours.

HDR (High Dynamic Range) pictures can depict more brightness gradations than the previous standard. This means a fuller colour palette with even richer, brighter colours.

A 10-bit colour depth with up to four times finer gradation ensures smooth transitions and bright and natural colour rendering – from every angle and with evenly balanced illumination.

METZ

The logo consists of the text "UHD 4K" in white, sans-serif font, centered within a solid blue rectangular background.

Sharpen your senses.

UHD stands for Ultra High Definition and offers a resolution that is four times higher than standard Full HD. Thus, UHD content comes in much more detail with approximately 8.3 million pixels as opposed to Full HD's 2.1 million.

This means that even when viewed from a short distance, picture quality remains surprisingly vivid and authentic.

Limitless entertainment with Android TV.

Films, series, games – as much as you want. New apps every day and access to a growing amount of diverse content – that's what your METZ blue TV offers you.

The integrated voice command with Google's Assistant will simplify your search for specific content. Personalised recommendations in Google Play Store, YouTube and apps create an even more individual TV experience.

And transferring content to other screens is child's play with a METZ blue Android TV: films, music, sport and games can be mirrored at the touch of a button to your TV from a smartphone, PC or tablet via Chromecast.

Watch original series, movies, and kids shows.
